Tuesday 18 February 2014

RTRFM's Full Frequency Presents: Go Bang! at Flyrite

RTRFM's flagship dance music program *Full Frequency* is set to explode from the airwaves onto the dance floor at **Go Bang!** Join in as a kaleidoscopic burst of underground dance floor beats, bass and electronics burn into the early AM hours on Friday 21 March at Flyrite.

Go Bang! sees *Full Frequency's* **Ben M** and **Rok Riley** present a night of Perth's premier beat selectors and live electronic artists. This will be a joyous exploration across the musical spectrum - from filthy low-slung hip-hop beats, through to the crisp kicks and snares of the freshest house and techno tunes.

Joining these celebrated RTRFM DJs on the night is Melbourne-based WA producer **Wooshie** representing the emerging */this thing/* record label. His synthesis of ambient electronics, experimental noise and hip-hop production has seen him appear on Boiler Room TV, and grace the stage at LA beat institution, *Low End Theory*.

Rising producer, sound artist, and KUČKA collaborator **Catlips** will deliver a live fusion of house, samples and musical warmth. **Atripat's** dubby techno and drone will prove an unstoppable emotive force, and **Henry Maxwell** is on-board to represent the new breed of this town's quality musical selectors.

Presenters of the highly influential RTRFM *Underground Solution* program will provide uncompromising, up-front selections as the **Underground Sound Solution System**. Plus – we'll have good friends of RTRFM, the **420 Crew**, playing back-2-back-2-back-2-back, bringing a bass-heavy rush of dance floor vibes.

Join us for a night of electronic beats, house and joyous noise as the Full Frequency family takes over the dance floor at Flyrite to **Go Bang!**

"If, at any point during three and five o'clock in the afternoon you're either on a major coffee high or struggling to focus on the computer screen, then flick to RTRFM for an instant office disco." SIX THOUSAND
